

CEU: Music and the Brain

Presented by Sheli Monacchio of Van Dyck Law

Social Workers, LNHA, and CALA will receive 1 credit hour

Friday, June 11, 2021

9:00am - 10:00am

Research shows that listening to music or singing songs provides behavioral, emotional and even physical benefits for those with dementia. Musical memories are preserved because the key brain areas linked to musical memory are undamaged by the disease. Learn how to incorporate music into your patient's life everyday for increased quality of life and a brain health benefit.

Participants must register in advance at
www.wilfcampus.org/events/music-and-the-brain/
Link to join the webinar will be emailed to you after you register.
